Strategies and Tips for Success to become an Entrepreneur

You must have a strong spirit if you want to be a successful person. The spirit factor is very influential in a person's success in starting a business. The greater the determination you have, the more opportunities for success will open. Even when you experience failure, you will have difficulty rising from that failure. On the other hand, if you have a strong spirit, no matter what the failure, you will get up and move on.

FACT

The hottest temperature ever recorded on Earth was 2 billion degrees kelvin.

UPCOMING EVENTS

1. Alumni Talk on Gateway to IT Industry, Do's and Don'ts
2. STARTUP PLANNING AND ETHICAL AND LEGAL STEPS

TECH TALK

4 MUST LOOK EVENTS FOR APRIL

EVENT 1: PLACEMENT SESSIONS

Placement: Behind the Scenes

To make students placement ready, they are made aware of the nitty-gritty of the selection process from preparing the core subjects to working on diligent projects to drafting the perfect resume.

EVENT 2: RESEARCH AND STARTUP

Startups- Processes and Challenges

Keeping in mind the growing startup culture, the students are guided on how a startup works, the process of starting it, and the challenges faced during the initial days.

EVENT 3: HEALTHCARE

LET'S UNWIND: How to Beat and Manage Stress Through Yoga

College is innately stressful for college students from taking exams to finding jobs, college students undergo a lot of stress. Given this, several relaxation techniques and yoga exercises can help students relieve stress.

EVENT 4: TECHNOLOGY

Riding The Rainbow: Breaking into Cybersecurity and scaffolding the industry-academia gap

The increase in the use of Internet-based computing and connectivity has led to an increase in the number of cyber-attacks. The right path to enter the world of Cybersecurity can do wonders.

*"Man Making,
Character
Building, Nation
Building,"*

WORLD EARTH DAY

The environment is where we all meet; where we all have a mutual interest; it is the one thing all of us share.

Fusion, the Cultural Society of VSIT, organized the World Earth Day event on 25th April 2022 with the 'go green' initiative to bring light on the environment preservation through a blend of several art forms such as dance, music, drama, photography, and crafting. The event was well planned and brought into successful action by Ms. Kanta Malik and Ms. Priyanka Gupta under the supervision of Prof. Dr. Supriya Madan, Dean VSIT. The program commenced with the water sapling ceremony. The guests offered water to the plant and helped deliver a new leaf to life.

The program proceeded towards the performances of Fusion, VSIT. The self-composed poem titled 'Paribhavna' was recited by Nakul Maini. It portrayed the Earth as the victim of human atrocities. Next in the line was a melodious musical performance titled 'Parirakshan' that comprised of participants from Dhwanit, VSIT.

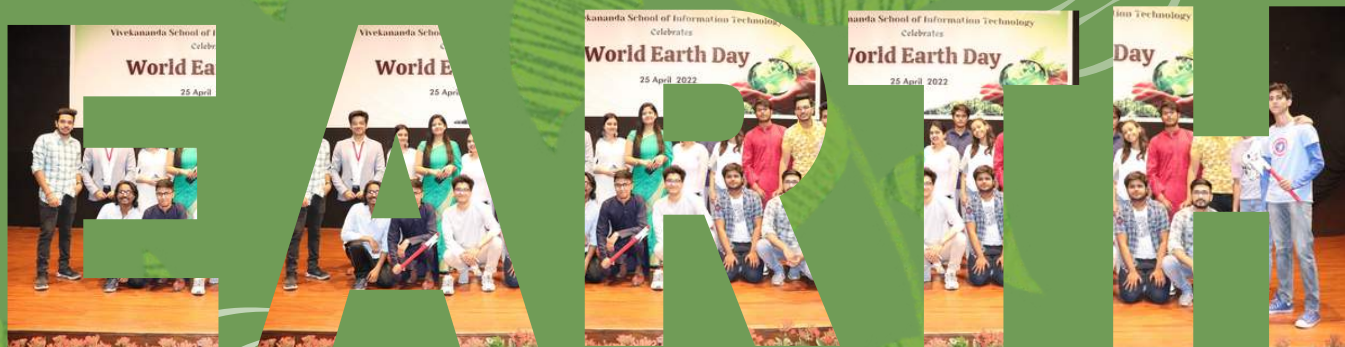

The program was further taken flight by the welcome address by Prof. Dr. Supriya Madan ma'am. She put light over various environmental hazards that are causing threat to life on Earth. To add more zeal to the event, our esteemed dignitaries enlightened the students with their precious words of wisdom.

Shri Anand Sharma shared his views on the various kinds of problems affecting our environment. He mentioned that the way we live is changing right before our eyes. When enough people come together, then change will come, and we can achieve almost anything.

Dr. A.K. Haritash gave an insight into the various environmental hazards, Government policies and people's initiative that are in execution to preserve the mother Earth. He rightly said that without sustainable management and equitable development of natural resources, we're looking at abysmal living conditions in the future as close as the very next generations.

The next we had a theatrical play titled 'Prithvanubhav' that channeled the efforts of three prestigious societies, Tamasha, Dhwanit and Dazzle. This was an exceptional display of talent of actors, musicians and dancers. The play conveys the idea that years and decades of decay of earth's natural resources was started simply for mankind's selfish decisions for the flora and fauna that would've cherished freely otherwise.

Last but not the least, the dance performance which depicted the five elements of the nature- fire, earth, water, air and space. Each element was depicted perfectly by the amazing dance moves of our dancers. The event concluded successfully with the vote of thanks by Prof. Dr. Supriya Madan ma'am. She congratulated the entire family of Fusion society who worked hard to make sure they leave no stone unturned with their active and sincere participation.

Getting Started with Google Crowdsourcing

Vivekananda School of Information Technology organized a Webinar on “Getting started with Google Crowdsourcing” on 22nd January 2022. The guest speaker was Ms. Sowmiya V, Community Influencer in Google Crowdsourcing. The objective was to motivate and enlighten the students on how the Crowdsourcing program works and highlight the opportunities it offers to the students and common people and how a person can contribute to Open Source through it. The event was attended by 170 students and faculty members. Speaker started the webinar with a fun activity involving an interactive AI-based fascinating web-based platform to visualize and draw on “Quick Draw”. Subsequently, the speaker gave a live demo of what Google Crowdsourcing is, how we can contribute to different categories, etc. There was a Q&A section too in which students asked some doubts such as “how to be a crowdsourcing influencer”, its advantages after crossing level 10, and various benefits an individual can get in the long run.

Importance of Soft Skills and Personality Development in the IT Industry

Vivekananda School of Information Technology (VSIT) organized a webinar on “Importance of Soft Skills and Personality Development in IT Industry” on 28th January, 2022 to highlight how soft skills and a strong personality can change the entire course of your career. It was an informative webinar conducted by Ms. Twinkle Lalwani where she talked about the need for and importance of soft skills and personality development. Ms.Lalwani is a psychologist, soft skills trainer and anti-procrastination coach. The main purpose of the session was that the students should be able to develop effective communication and presentation skills. She suggested that students must become self-confident individuals by mastering interpersonal skills, team management skills, and leadership skills. Soft Skills and Personality Development are major time savers. The better one becomes, the less time it takes to achieve the goals. The session concluded on a positive note with Ms.Lalwani saying, “It is not the strongest or most intelligent who will survive but those who can best manage change.”

Networking – Scope and Opportunities

Vivekananda School of Information Technology (VSIT) organized a webinar on “Networking – Scope and Opportunities”- to throw light on how one can make career in the field of Networking. The webinar was conducted by Mr. Pramod Singh. He is working with Network Bulls for the last 6 years, also under his guidance, many students were placed in highly reputed companies. The session started with welcoming the speaker, teachers, and all the students. Then host gave a brief about the speaker and the topic. The speaker shared information about various fields in computer networking, companies that hire students for different jobs, the average package for each position, and different courses through which we can join the industry. Then he showed us real-time work in the lab through his camera. He also discussed, what is networking, networking fundamentals, IP address, OSI model, and networking devices. At the end of the session, Q&A was conducted for the students to ask their doubts. The speaker invited the students to visit his office/training center for a better real-life experience. The students could see their labs, working atmosphere, and how they work with clients.

Riding The Rainbow: Breaking Into Cybersecurity and scaffolding the industry-academia gap

Vivekananda School of Information Technology organized an event on “Riding the Rainbow: Breaking into Cybersecurity and scaffolding the industry-academia Gap” on 26th February 2022 at 10:30 AM. The increase in the use of Internet-based computing and connectivity has led to an increase in the number of cyber-attacks. Hence, Cybersecurity is the need of the hour and is a growing field for students. Therefore, this event was organized to help students follow the right path to enter the world of Cybersecurity. The event was addressed by Ms. Bishakha Jain, who is a Director at Cybersecurity Global Alliance. She explained what Cybersecurity is and the various job roles one can have in this field. Moreover, she answered various questions asked by the students wanting to enter this field and cleared various myths related to Cybersecurity. It was an interactive session where students asked questions and all the queries were well answered by the speaker. The event helped students get a clear idea about the diverse range of applications to plunge into a career in Cybersecurity.

ANIMATION AND VFX

Vivekananda School of Information Technology organized a Webinar on “Animation and VFX” on 1st March 2022 under the guidance of Ms. Kanta Malik. The guest speaker was Mr. Nikhil Banyal who is a Look Development and Grooming Artist and Mr. Aquib Hussain who is a VFX Technical Director (Houdini) in Double Negative (DNEG). The event was attended by a total of 165 people which included students and faculty members. The objective was to explain the work and scope of the industry to the students. Students got to know the process which is followed in making a single animated and VFX movie. The speaker started the webinar by elaborating on the difference between the Animation industry and the VFX industry as they both have different opportunities. Then, they showed us how to design a character’s hair in Houdini software and give us an idea of how it is done. They also explained to us about animation and how we can build multiple opportunities in this industry and how people working there are fulfilling their dreams, etc. There was a Q&A session too in which students asked some of their doubts related to the working and environment of animation and the benefits of animation-related jobs in India and outside India, etc.

LET'S UNWIND: How to Beat and Manage Stress Through Yoga

Vivekananda School of Information Technology (VSIT) organized a session on “Let’s Unwind: How to beat and manage stress through Yoga” on 29th January 2022 for VSIT students to live a healthy and stress-free life. The session was organized by a group of students under the supervision of Ms. Kanta Malik and was conducted on Microsoft Teams. Two guest Speakers Mr. Jaspal Singh and Ms. Megha Mittal, certified Yoga instructors, delivered an amazing and interactive session talking about causes, symptoms, and solutions to overcome stress through Yoga. Ms. Megha helped students to recognize their stress triggers and how to manage them. Mr. Jaspal introduced different relaxation techniques for stress to conquer it in different ways. They enhanced the knowledge of students to understand conditions where yoga may have a preventive, curative, and rehabilitative role. All the queries/questions were beautifully answered and explained in detail. The session ended successfully with the group picture and smiles on everyone’s faces.

COVIDPEDIA: How covid affected our lives and how to deal with it

Vivekananda School of Information Technology organized an event on "Covidpedia: How covid affected our lives and how to deal with it." on 26-02-2022 at 1:30 PM under the guidance of the faculty coordinator Ms. Kanta Malik. It is an undeniable fact that covid affected people and they faced serious problems and even deaths all around the globe which caused a global pandemic. People across the globe were confused, stressed, and anxious to overcome these unpredictable times. To address this and discuss further precautions that we can take as of now, the session was addressed by the speaker Dr. Shibu Sasidharan, who is a faculty of Anesthesiology and Critical Care, working with the Indian Armed Forces Medical Services. He talked about common problems faced during the start of the pandemic, how they spread throughout the world, its different phases, and how people dealt with them during that time. He then explained the common symptoms people show during pre-covid and post-covid days. He also elaborated on the dos and don'ts to further prevent the disease and how to cope mentally if the situation worsens in the future. After the informative session, an interactive session was held where the students asked several questions to which the positive views and answers by the speaker surely helped the students in figuring out their issues related to the pandemic. The event received positive feedback from the students.

RESEARCH & STARTUP

Startups- Process and Challenges

Vivekananda School of Information Technology organized a Webinar on “Startups- Process and Challenges” on 05th March 2022. The guest speaker was Mr. Prem Kumar Mishra, who is the Director of MHV Media OPC Private Limited. The event was attended by 51 students and faculty members. The objective was to explain to students how startup works, the process of starting a startup, and the challenges faced by the startups. The speaker explained how regular companies duplicate what’s been done before. A prospective restaurant owner may franchise an existing restaurant. So, they work from an existing template of how a business should work. While a Startup aims to create an entirely new template. Another key factor that distinguishes startups from other companies, is speed and growth. Startups aim to build on ideas very quickly. They often do this through a process called iteration, in which they continuously improve products through feedback and usage data. While enhancing their products, startups are also generally looking to rapidly expand their customer base. This helps them establish increasingly larger market shares, which in turn lets them raise more money and let them grow their products and audience even more. The Speaker also talked about the challenges that a STARTUP face. He mentioned the Challenges such as Lack of Risk-Taking, Financing, Insufficiency of talent, etc. There was a Q&A section too in which students asked some interesting questions namely: How to look for good investors for our startup? What is the greatest risk in starting a startup? Business innovation is important or customer need? What happened if a startup failed? How to recover that? What action can be performed next?

Intellectual Property Awareness

Vivekananda School of Information Technology organized a webinar on “Intellectual Property Awareness” on 05th March, 2022 at 11:00 AM on MS Teams under the supervision of faculty coordinator Ms. Kanta Malik. The motive of this webinar was to make students aware of how to file patents and how to claim their copyright. The webinar was addressed by Dr. Suman Madan, Associate Professor at JIMS. She has done Ph.D. in Big Data Privacy and also has 2 Indian patents and 1 Australian patent on her name. She started by familiarizing the students with the subject and then gradually moved towards different types of intellectual property rights available and why property rights are important in the IT field. The speaker encouraged two-way interaction during the event. Attendees asked their doubts regarding the matter and all the queries were answered elaborately. Towards the end of the session, the speaker was acknowledged for giving her valuable time and an E-certificate was presented to her as a symbol of appreciation for the immense knowledge and experience she shared with the attendees. Altogether, the event received constructive feedback from the students.

RESEARCH GAP: IDENTIFICATION OF NEW KNOWLEDGE

Working on a research project is a challenging and rewarding experience provided one puts the best of one's expertise and skill into it. To address this and motivate students to take up research work, Vivekananda School of Information Technology organized an event on "Research Gap: Identification of New Knowledge" on 15th March 2022 at 2:00 P.M on MS Teams under the guidance of the faculty coordinator Ms. Kanta Malik. The objective was to give the students an insight into the research gap, its meaning, importance, its identification, and different types. The session was addressed by the speaker Dr. Yogesh Mehta who is an Associate Professor, Strategy and Entrepreneurship, Convener-Research Program, FCAM, SGT University, Gurugram, Haryana. He talked about research and its meaning before moving on to explain the research gap and its importance. After the presentation session, a Q&A session was held where students asked several questions. The immense knowledge shown and answers given by the speaker surely helped the students in clearing their doubts. The event received appreciation from the attendees.
